Linkedin - Michael Olagunju Github Profile Portfolio Website

Software Engineer experienced in designing and building scalable web and mobile applications using modern JavaScript/TypeScript and Java ecosystems. Skilled in backend architecture, API development, real-time systems, and cloud deployment. Passionate about building production-ready software, solving complex engineering problems, and continuously improving system performance and developer workflows. Experienced working across startups, fintech environments, and educational technology projects.

Experience

Backend Engineer — Groom | Part-Time *2026 - present*

Develop and maintain backend APIs, authentication systems, and server-side application logic.

Backend Engineer — DeepRevAi (AdsVase) | Part-Time *2026 - present*

Develop and maintain backend APIs, authentication systems, and server-side application logic.

IT Executive - OTL AFRICA DOWNSTREAM *October 2025 - present*

Manage IT operations and technical support; designed and maintained company websites and digital systems.

Programming Instructor - NIIT (Part-Time) *Aug 2023 - Oct 2024, Oct 2025 - June 2026*

Teach programming concepts and mentor students through practical software development training.

Web Developer — MYDAHSOFT ICT Ltd. | Contract *2024 - 2026*

Built and maintained responsive web applications based on client requirements.

Software Engineer Intern - TEDFINANCE *2025 - 2025*

Built and maintained frontend interfaces, implemented UI features, and collaborated with backend teams to improve user experience.

Projects

Groom - AI Onboarding tool for SaaS

- Built backend services powering AI-driven onboarding analytics used to track customer journeys and product adoption.
- Developed reporting and data export systems that transformed large datasets into actionable business insights.
- Integrated AI services and cloud storage solutions to automate report generation workflows.

Adsvase

- Engineered real-time group chat functionality using scalable backend architecture.
- Developed user profile management and account services supporting authentication, authorization, and user administration.
- Designed RESTful APIs and database structures to support platform growth and reliability.

Mydahsoft

- Developed Learning Management System (Mydahsoft Academy) using Wordpress.
- Built business landing pages, strengthening skills in frontend development, system structuring, and building user-focused web applications.

Built and contributed to production applications, developing strong skills in software architecture, backend development, database design, performance optimization, and team collaboration.

Education

Jan 2022 - March 2024

NIIT

- ProfessionalDiplomain Full Stack Development (Software Engineering)

May, 2025 - Ongoing

Miva Open University

- BSc. Computer Science

Skills

Technical Skills

Languages: Java, JavaScript, Python, TypeScript
Backend: Node.js, Express, Springboot,Nest.js Swagger, REST APIs, Authentication (JWT), API Design
Frontend: React, Next.js, React Native, Flutter(Foundational Knowledge)
Real time systems: WebSockets, UI Live Updates, Event-Driven Architecture(microservices)
Databases: Mongodb, Mysql, Mssql, Postgresql
Tools & Platforms: Docker, Cloudinary, AWS (EC2, S3), CI/CD Concepts, Deployment Pipelines

Social Skills

- Strong problem-solving and analytical thinking
- Effective collaboration in cross-functional teams
- Rapid learning and adaptability to new technologies
- Ability to translate business requirements into technical solutions Passion for
- continuous improvement and engineering excellence
