[Portfolio Website](#)

Software Engineer experienced in designing and building scalable web and mobile applications using modern JavaScript/TypeScript and Java ecosystems. Skilled in backend architecture, API development, real-time systems, and cloud deployment. Passionate about building production-ready software, solving complex engineering problems, and continuously improving system performance and developer workflows. Experienced working across startups, fintech environments, and educational technology projects.

Experience

- **Backend Developer — DeepRevAi (AdsVase) | Part-Time** 2026 - present
Develop and maintain backend APIs, authentication systems, and server-side application logic.
- **IT Executive - OTL AFRICA DOWNSTREAM** 2025 - present
Manage IT operations and technical support; designed and maintained company websites and digital systems.
- **Programming Instructor - NIIT (Part-Time)** Aug 2023 - Oct 2024,
Oct 2025 - present
Teach programming concepts and mentor students through practical software development training.
- **Web Developer — MYDAHSOFT ICT Ltd. | Contract** 2024 - 2026
Built and maintained responsive web applications based on client requirements.
- **Software Engineer Intern - TEDFINANCE** 2025 - 2025
Built and maintained frontend interfaces, implemented UI features, and collaborated with backend teams to improve user experience.

Projects

- **Task & Project Management Solution (Ongoing)**
 - Developing a task and project management web app to streamline task assignment, progress tracking, and collaboration. Built with React, Node.js, Express, and MongoDB, featuring real-time updates, user roles, and notifications. Enhancing skills in full-stack development, real-time data handling, and scalable architecture.
- **School Management System**
 - Built a web-based School Management System using Java, JSP, and Servlets. Features include student enrollment, teacher management, and course administration. Used JSP for dynamic pages, Servlets for backend logic, and JDBC for database connectivity. Improved my skills in Java EE, MVC architecture, and web development.

● Websites & Web Apps Development (Freelance projects)

- SchoolWebsite – Showcased academic programs, faculty, and student resources.
- NGO Websites – Built platforms for awareness, donations, and volunteer management.
- E-commerce Website – Developed an online store with product listings, cart, and payment integration.
- LMS (Learning Management System) – Implemented course management, student tracking, and content delivery.

Gained hands-on experience in frontend & backend development, and CMS integration, continuously improving my skills.

Education

● NIIT

Jan 2022 - March 2024

- Professional Diploma in Full Stack Development (Software Engineering)

● Miva Open University

May, 2025 - Ongoing

- BSc. Computer Science

Skills

● Technical Skills

Languages: Java, JavaScript, Python, TypeScript

Backend: Node.js, Express, Springboot, Nest.js Swagger, REST APIs, Authentication (JWT), API Design

Frontend: React, Next.js, React Native, Flutter (Foundational Knowledge)

Real time systems: WebSockets, UI Live Updates, Event-Driven Architecture (microservices)

Databases: MongoDB, MySQL, MSSQL, PostgreSQL

Tools & Platforms: Docker, Cloudinary, AWS (EC2, S3), CI/CD Concepts, Deployment Pipelines

● Social Skills

- Strong problem-solving and analytical thinking
- Effective collaboration in cross-functional teams
- Rapid learning and adaptability to new technologies
- Ability to translate business requirements into technical solutions
- Passion for continuous improvement and engineering excellence
